Released 19 December 2025. Next release 22 January 2026.

Headlines

Gross HMRC Tax and NICs receipts for April 2025 to November 2025 are £579.0 billion, which is £41.8 billion higher than the same period last year.

The data source for this release is available in the [HMRC tax receipts and NICs statistics table \(https://www.gov.uk/government/statistics/hmrc-tax-and-nics-receipts-for-the-uk\)](https://www.gov.uk/government/statistics/hmrc-tax-and-nics-receipts-for-the-uk). Monthly receipts data is available from April 2016.

Figure 1, HMRC receipts for April 2025 to November 2025

Figure 1 above shows total HMRC receipts for April 2025 to November 2025 compared with the same period last year in both percentage and monetary terms and shows:

- cash receipts were higher from Income Tax, Capital Gains Tax and National Insurance contributions (NICs) (£34.0 billion), VAT (£5.1 billion) and stamp taxes (£1.4 billion)
- cash receipts were lower from tobacco duties (£0.2 billion)
- in percentage terms, receipts were higher for stamp taxes (12%), Income Tax, Capital Gains Tax and NICs (11%) and Air Passenger Duty (8%), and lower for tobacco duties (4%)

About this release

This bulletin includes monthly receipts (on a cash basis) for the current and last three financial years from tax and duties, NICs, and fines and penalties that HMRC are responsible for administering.

Cash receipts data for April 2024 to March 2025 are aligned with the [HMRC annual report and accounts \(ARA\)](https://www.gov.uk/government/collections/hmrcs-annual-report-and-accounts) (<https://www.gov.uk/government/collections/hmrcs-annual-report-and-accounts>), though differences between the two publications exist as the HMRC ARA presents data on an accrued basis. Cash receipts from April 2025 remain provisional until aligned to the ARA due to be published in Summer 2026.

Further background on the methodology, release and quality of these statistics can be found in the [quality report for HMRC Receipts](https://www.gov.uk/government/statistics/hmrc-receipts-quality-reports) (<https://www.gov.uk/government/statistics/hmrc-receipts-quality-reports>) on GOV.UK.

Previous publications of these statistics can be found in the [National Archives website](https://webarchive.nationalarchives.gov.uk/ukgwa/*/https://www.gov.uk/government/statistics/hmrc-tax-and-nics-receipts-for-the-uk) (https://webarchive.nationalarchives.gov.uk/ukgwa/*/https://www.gov.uk/government/statistics/hmrc-tax-and-nics-receipts-for-the-uk)

Income Tax, Capital Gains Tax and NICs

Income Tax, Capital Gains Tax and NICs receipts for April 2025 to November 2025 are £329.5 billion, which is £34.0 billion higher than the same period last year.

PAYE IT and NICs receipts for April 2025 to November 2025 are £309.6 billion, which is £32.0 billion higher than the same period last year. The latest receipts in November largely relate to October liabilities. Estimates on earnings and employment are available in [HMRC's published statistics](#)

<https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/earningsandworkinghours/bulletins/earningsandemploymentfrompayasyouearnrealtimeinformationuk/previousReleases>).

Self Assessment Income Tax, Capital Gains Tax and NICs receipts for April 2025 to November 2025 are £19.6 billion, which is £2.4 billion higher than in the same period a year earlier.

Figure 2, Monthly Receipts

Figure 2 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- peaks in July and January each year reflect the bi-annual due dates for SA
- peaks in January to April typically capture PAYE bonus-related receipts, particularly from the financial sector
- the NICs rates increase, effective from April to October 2022, affects HMRC's NICs receipts from May to November 2022 inclusive
- the NICs Primary Threshold increase, effective from July 2022, affects HMRC's NICs receipts from August 2022 onwards
- the reduction of Employee National Insurance rates from 12% to 10%, effective from January 2024, affects receipts from February 2024

onwards

- the reduction of Employee National Insurance rates from 10% to 8%, effective from April 2024, affects receipts from May 2024 onwards
- the high receipts in January 2025 are mainly due to Self Assessment Income Tax which are the highest on record
- the changes to Employer Class 1 NICs, effective from April 2025, will affect receipts from May 2025 onwards

Further information on Income Tax and personal incomes is available in the [personal taxes section \(https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics\)](https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics) published on GOV.UK.

Value Added Tax (VAT)

Total VAT receipts for April 2025 to November 2025 are £122.5 billion, which is £5.1 billion higher than the same period last year.

Small revisions have been made to provisional VAT receipts for July 2025 and October 2025 following additional real-time assurance. Receipts data for 2025 to 2026 remain provisional until they are aligned with HMRC annual report and accounts due to be published in Summer 2026.

Figure 3, Monthly receipts

Figure 3 above shows the monthly receipts patterns in each financial year since 2022 to 2023 shows:

- large peaks in April, July, October, and January reflect when the majority of receipts are paid quarterly and largely corresponding with the end of the financial and calendar years
- receipts in 2022 to 2023 may have been influenced by both high levels of inflation and subsequent changes in real consumer expenditure, though it is not possible to directly disaggregate these effects
- receipts for April 2023 to March 2024 are £10.3 billion higher when compared to the same period in the year earlier and this could be due to consumption remaining at the same level in real terms while prices have increased
- 2024 to 2025 receipts are £2.6 billion higher when compared to the same period in the year earlier, and the relatively small growth could be attributed to a lower share of consumption on goods at the standard rate of VAT than was the case in 2023 to 2024

Further information and statistics on VAT are available in the [Excise duties, VAT and other indirect tax statistics section](https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies) (<https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies>) on GOV.UK.

Business Taxes

This section includes receipts from Corporation Tax, Petroleum Revenue Tax, Bank Levy (from July 2011), Bank Surcharge (from April 2016), Diverted Profits Tax (from March 2017), Digital Services Tax (from March 2022), Residential Property Developer Tax (from June 2022), Energy Profits Levy (from December 2022), Electricity Generator Levy (from September 2023) and Economic Crime Levy (from September 2023).

Business Taxes receipts for April 2025 to November 2025 are £55.6 billion, which is £0.5 billion higher than the same period last year.

Figure 4, Monthly receipts

Figure 4 above shows the monthly receipts pattern in each financial year since 2022 to 2023 and shows:

- peaks in June, September, December and March are when most of the largest companies make their Corporation Tax quarterly instalment payments

- the much higher receipts in January 2023 compared with a year earlier is mainly due to higher offshore receipts, because of high energy prices following Russia's invasion of Ukraine, and the new Energy Profits Levy
- the noticeably higher receipts in June 2023, September 2023, December 2023 and March 2024 compared with previous years can be attributed to the increase in the main rate of Corporation Tax from 19% to 25% in April 2023, alongside growth in company profits
- receipts in December 2024 are the highest on record, and this is mainly due to the full effects of the Corporation Tax rate increase feeding through to cash receipts payments

Further information and statistics on these taxes are available in the [corporate tax statistics section](https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics) (<https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics>) on GOV.UK.

Stamp Taxes and Annual Tax Enveloped Dwellings (ATED)

Stamp Taxes receipts for April 2025 to November 2025 are £13.6 billion, which is £1.4 billion higher than the same period last year.

Figures exclude land transaction taxes devolved to Scotland and Wales.

Figure 5, Monthly receipts:

Figure 5 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- receipts between October 2022 and March 2025 are impacted by [lower rates of Stamp Duty Land Tax \(https://www.gov.uk/stamp-duty-land-tax/residential-property-rates\)](https://www.gov.uk/stamp-duty-land-tax/residential-property-rates) introduced from 23 September 2022
- higher receipts in October to December 2024 compared to the year before are driven by the increase to the higher rates of Stamp Duty Land Tax surcharge (Higher Rates for Additional Dwellings) on 31 October 2024 and increased transaction levels
- higher receipts in February to April 2025 compared to previous years are driven by a combination of increased transaction levels prior to the change to residential Stamp Duty Land Tax thresholds from April 2025 and higher rates of Stamp Duty Land Tax surcharge for additional properties
- higher receipts in July 2025 to October 2025 compared to the same period last year is mainly due to the decrease in thresholds for residential main rates and First Time Buyers' Relief effective from 1 April 2025

Further information and statistics on stamps taxes are available in the [property statistics section \(https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics\)](https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics) on GOV.UK.

Hydrocarbon Oil (fuel duty)

Hydrocarbon Oils receipts for April 2025 to November 2025 are £16.4 billion, which is £43 million lower than the same period last year.

Figure 6, Monthly receipts

Figure 6 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- troughs at the beginning of each calendar year in January are most likely to be a result of bad weather conditions
- the lower receipts observed in July 2023 are due to a timing issue which has been offset in August
- total receipts for April 2023 to March 2024 are £0.2 billion lower when compared to the same period a year earlier, primarily driven by a general move away from diesel towards alternative fueled vehicles, including electric and hybrid electric vehicles

Further information and statistics on road fuel taxes are available in the [Excise duties, VAT and other indirect tax statistics section](https://www.gov.uk/government/statistics/hmrc-tax-and-nics-receipts-for-the-uk/hmrc-tax-receipts-and-national-insurance-contributions-for-the-u...)

(<https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies>) on GOV.UK.

Tobacco duty

Tobacco receipts for April 2025 to November 2025 are £5.5 billion, which is £0.2 billion lower than the same period last year.

Figure 7, Monthly receipts

Figure 7 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- the pattern in monthly receipts can be volatile, though the downward trend is expected given the tax was designed in part to reduce uptake and use of tobacco products across the country
- monthly volatility may be caused by high clearances one month followed by low clearances the next month, and these fluctuations can follow price increases by manufacturers, for example forestalling, whereby a manufacturer will bulk release products for consumption prior to

anticipating duty increases at budget, though this can vary each year depending on the timings of the budget

Cigarettes are also subject to anti-forestalling restrictions in advance of a Budget, and further information is available in the [HMRC Notice 85C](https://www.gov.uk/government/publications/excise-notice-85c-anti-forestalling-restrictions-cigarettes) (<https://www.gov.uk/government/publications/excise-notice-85c-anti-forestalling-restrictions-cigarettes>) published on GOV.UK.

Further information and statistics on Tobacco Duty are available in the [Excise duties, VAT and other indirect tax statistics section](https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies) (<https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies>) on GOV.UK.

Alcohol Duty

Alcohol receipts for April 2025 to November 2025 are £8.4 billion, which is £33 million higher than the same period last year.

Figure 8, Monthly receipts

Figure 8 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- receipts in a particular month largely relate to liabilities (alcohol being released for consumption) in the month prior
- December peaks are due to higher levels of alcohol being released for consumption during November in preparation for the Christmas period
- the high peak in July and August 2023 receipts could be partly due to forestalling, pointing to higher levels of alcohol being released for consumption in anticipation of Alcohol Duty changes from the 1 August 2023 but also the cost of living may have had an impact as it could result in more off-trade drinking (drinking at home) which is cheaper and can increase consumption
- receipts may have been further impacted by the Alcohol Duty Reforms that were implemented in August 2023, causing changes to both producer and trader behaviour
- the December 2024 peak can be attributed to higher receipts from spirits which are the highest on record at £0.6 billion
- the higher receipts in February 2025 are possibly due to trader behaviour around Alcohol Duty changes from 1 February 2025
- higher receipts in November 2025 are possibly related to forestalling ahead of the Autumn Budget

Further information and statistics on Alcohol Duties are available in the [Excise duties, VAT and other indirect tax statistics section](https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies) (<https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies>) on GOV.UK.

Environmental Taxes

This section includes receipts from Landfill Tax, Aggregates Levy, Climate Change Levy, Carbon Price Floor and Plastic Packaging Tax.

Environmental Taxes receipts for April 2025 to November 2025 are £2.2 billion, which is £97 million higher than the same period last year.

Figure 9, Monthly receipts

Figure 9 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- peaks in April, July, October, and January, reflect when most traders make their quarterly instalment payments
- higher receipts in May 2021, August 2021, November 2021, and February 2022 can be attributed to timing effects linked to the month prior
- Climate Change Levy receipts in April 2025 are the highest on record, and may be a timing effect offset by lower receipts in May 2025

Further information and statistics on environmental taxes are available in the [Excise duties, VAT and other indirect tax statistics section](https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies) (<https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies>) on GOV.UK.

Air Passenger Duty (APD)

Air Passenger Duty receipts for April 2025 to November 2025 are £3.1 billion, which is £0.2 billion higher than the same period last year.

Figure 10, Monthly receipts

Figure 10 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- receipts tend to rise in the summer months and fall during winter, with a slight upturn in January, reflecting increased travel during December
- following COVID-19, where receipts fell in March 2020, and the subsequent lifting of travel restrictions that followed, the sector has recovered, and receipts have now surpassed pre-pandemic levels
- monthly receipts in 2022 to 2023, 2023 to 2024, 2024 to 2025 and from April to September 2025 are all higher when compared to the same period in the year prior which could be a sign of the industry's continued growth
- higher receipts in November 2025 follow lower receipts in October 2025 which could be attributed to timing

Further information and statistics on APD are available in the [Excise duties, VAT and other indirect tax statistics section](https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies) (<https://www.gov.uk/government/collections/vat-excise-duties-and-other-minor-industry-specific-duties-and-levies>) on GOV.UK.

Inheritance Tax (IHT)

Inheritance Tax receipts for April 2025 to November 2025 are £5.8 billion, which is £84 million higher than the same period last year.

Figure 11, Monthly receipts

Figure 11 above contains the monthly receipts patterns in each financial year since 2022 to 2023 and shows:

- higher receipts from March 2022 are expected to be due to a combination of higher volumes of wealth transfers following recent liable deaths, recent rises in asset values, and the government's March 2021, Autumn 2022, and Autumn 2024 decisions to maintain the tax free thresholds at their 2020 to 2021 levels up to and including 2029 to 2030, and more information on these decisions are available in the policy papers accompanying the [Budget 2021 Finance Bill](https://www.gov.uk/government/publications/inheritance-tax-nil-rate-band-and-residence-nil-rate-band-thresholds-from-6-april-2021) (<https://www.gov.uk/government/publications/inheritance-tax-nil-rate-band-and-residence-nil-rate-band-thresholds-from-6-april-2021>), the [Autumn Finance Bill 2022](https://www.gov.uk/government/publications/inheritance-tax-nil-rate-band-and-residence-nil-rate-band-thresholds-from-6-april-2026) (<https://www.gov.uk/government/publications/inheritance-tax-nil-rate-band-and-residence-nil-rate-band-thresholds-from-6-april-2026>), and the [Autumn Budget 2024 documents](https://www.gov.uk/government/publications/autumn-budget-2024) (<https://www.gov.uk/government/publications/autumn-budget-2024>)
- higher receipts in June 2022, November 2022, June 2023, October 2023, September 2024, October 2024 and April 2025 can be partially attributed to a small number of higher-value payments than usual

Further information and statistics on IHT are available in the [personal incomes statistics section](https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics#personal-taxes) (<https://www.gov.uk/government/organisations/hm-revenue-customs/about/statistics#personal-taxes>) on GOV.UK.
